BEXAR COUNTY JUVENILE PROBATION

Risk-Responsivity Recidivism for Child Case Closures* from 8/1/2014 through 7/31/2016

***Recidivism Definition**

Recidivism for Child Case Closures looks at Contiguous Periods of Care with BCJPD. These periods are calculated as a period of time when a child has one or more active referrals with BCJPD. The Period of Care begins with an adjudicable referral and ends when the last of the child's referrals are closed. Recidivism can occur within two years of the date each child's last referral was closed.

Recidivism is defined as a Misdemeanor B or above offense within two years of a child exiting from the care of Bexar County Juvenile Probation (BCJPD). Exits associated with both successful, unsuccessful, and other supervision outcomes are included in the Def Pros and Probation categories. The recidivism event can be a Misdemeanor B or above Incident Date as referred to BCJPD or an arrest in the Bexar County Adult System as reported to DPS.

****Risk Level Definitions**

Risk Level from the first PACT during the child's Period of Care. If no PACT was completed during the child's Period of Care with BCJPD, then the risk level is that of the first TJJD RANA administered during the Period of Care. If no PACT or TJJD RANA was found, then Risk Level is reported as "None".

*****Supervision Level Definitions**

-ACR: ACR'ed children were referred to BCJPD on an adjudicable referral. These children were active with the department until such time as their last adjudicable referral was ACR'ed. These children had no Deferred Prosecution Contracts or Probation terms during this period of activity with BCJPD, although several referrals occurring during his/her Period of Care may have been dismissed, rejected, or otherwise closed without a supervision.

-Def Pros: Deferred Prosecution children were referred to BCJPD on an adjudicable referral. These children were active with the department and placed on a Deferred Prosecution contract. These children may have been placed on multiple Deferred Prosecution contracts, but were never placed on any form of probation during their Period of Care with the department. The Period of Care with the department ended when the child's last adjudicable referral was closed.

-Probation: Probation children were referred to BCJPD on an adjudicable referral and eventually placed on some form of Probation. These children may have also been placed on a Deferred Prosecution contract or received one or more ACRs. The Period of Care with the department ended when the child's last adjudicable referral was closed.
